

Navigating the legal challenges of liberalised energy markets in transformation.

The increasing demand for affordable energy, national interests in security of supply and political goals to deal with a changing global climate are causing increased activities of regulators and parliaments.

We represent many leading companies both nationally and internationally in the energy sector and cover the full range of legal topics relating to energy & natural resources. These include licensing, transmission and distribution, oil and gas projects, as well as joint ventures.

Robust tailor-made solutions for all issues

Our clients are Swiss and European energy suppliers, energy trading companies, power plant operators and large consumers of energy. We have in-depth knowledge across all areas of regulation. Combined with our expertise in related areas such as M&A and administrative law as well as our passion to understand the technicalities behind the legal rules, we are ready to provide tailor-made solutions to our clients.

Our areas of activity include:

- Energy supply contracts
- Energy trading (including emission trading)
- Grid access and usage
- Hydropower
- Oil and gas
- M&A in the energy & natural resources sector
- Regulation and regulation management
- Litigation
- Regulatory and administrative proceedings
- Competition law

The team is technically excellent and more pragmatic and commercial than others.
